02 / JAVA SETUP

Full Modpack

Complete visual and quality-of-life pack.

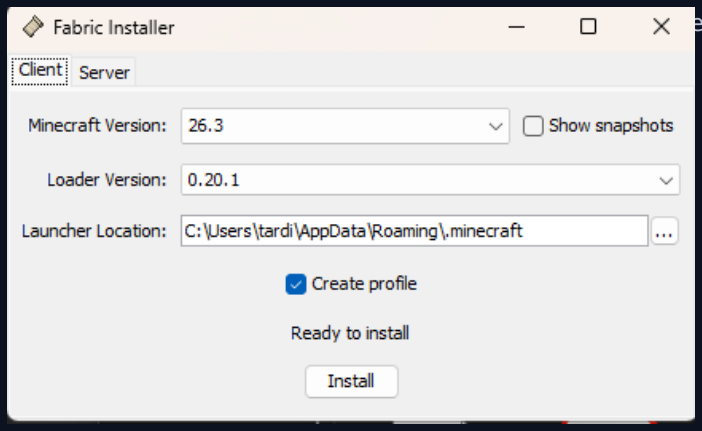

WHAT YOU NEED

Minecraft Java 26.3; Fabric Loader; the Full Modpack ZIP. Visual resource packs are optional.

01 **Install Minecraft Java 26.3**

Install and launch Minecraft Java Edition 26.3 once.

02 **Install Fabric Loader**

eck Create profile, then Install.

Fabric installer

03 **Download Full Modpack**

Extract the outer ZIP. Put the individual mod .jar files into your Fabric profile mods folder.

Download Full modpack

04 **Open mods (Windows)**

Win + R, type %AppData%\.minecraft\mods. If using a different launcher, use that profile folder.

05 **Launch Fabric 26.3**

Choose your Fabric profile and start Minecraft.

06 **Join the server**

Multiplayer → Add Server → Server Address: tokishollow.fun. Save and Join.

OPTIONAL FINISH

Use the Resource Packs page for Fresh Animations, connected glass and BSL shaders.

03 / JAVA SETUP

Lite Modpack

Essential client mods without the extra visual stack.

WHAT YOU NEED

Minecraft Java 26.3; Fabric Loader; the Lite modpack ZIP. No additional resource pack required.

01 Launch Java 26.3 once

Use Minecraft Launcher to install the matching version.

02 Install Fabric Loader

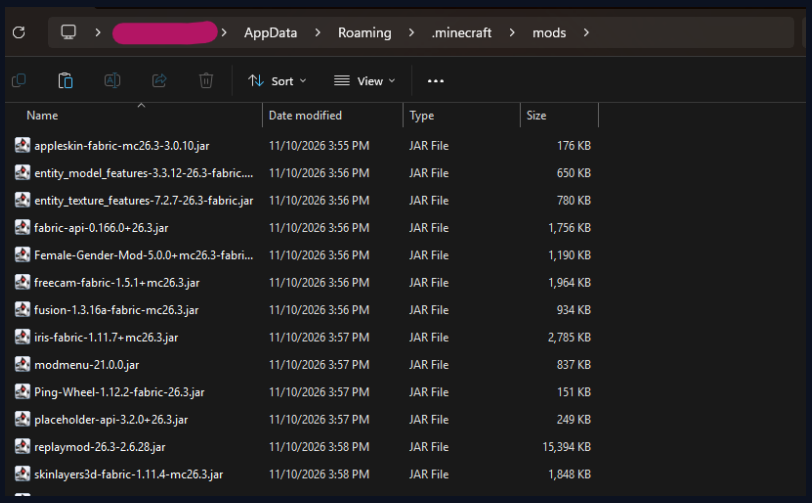

Select the Client installer, Minecraft 26.3, then Create profile.
Official Fabric installer

03 Download Lite Modpack

Extract the outer ZIP; copy the included .jar files, not the outer ZIP.
Download Lite modpack

04 Place the mod JARs

Open %AppData%\.minecraft\mods or your launcher profile mods folder.

05 Launch the Fabric profile

Keep Full and Lite in separate profiles if you switch between them.

06 Join Toki’s Hollow

Add tokishollow.fun in Multiplayer.

LITE INCLUDES

AppleSkin, Fabric API, Mod Menu, Ping Wheel, Placeholder API, Sodium and Simple Voice Chat. Shared Ping Wheel pings are under testing.

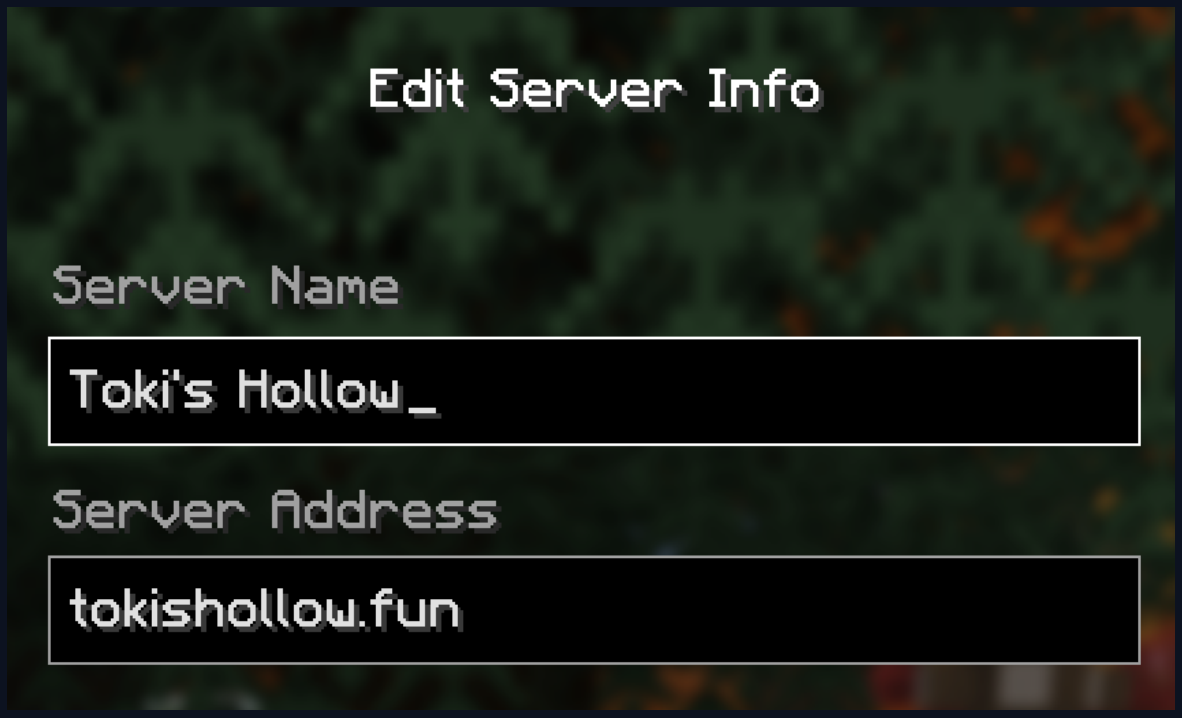

04 / JAVA SETUP

No mods? No problem.

Use an ordinary Minecraft Java client.

01 **Launch Minecraft Java 26.3**
No Fabric Loader and no modpack are needed.

02 **Add the server**
Multiplayer → Add Server. Use Toki’s Hollow as the name and tokishollow.fun as the address.

03 **Join and play**
All server-side features still work, including protection regions, homes and graves.

OPTIONAL CLIENT FEATURES

Voice chat, Ping Wheel, minimaps, replay recording and shaders are client extras. You can add them later with the Full or Lite pack.

05 / BEDROCK SETUP

Bedrock Edition

No Fabric, Java modpacks or client JAR files.

CONNECTION

Address: impairment-puppy.tun.ply.gg
Port: 19132

01 **Open Bedrock Edition**
Use a platform that supports adding an external server, such as many PC and mobile clients.

02 **Open Add Server**
Play → Servers → Add Server, if the option is present on your device.

03 **Enter the details**
Server Name: Toki’s Hollow
Server Address: impairment-puppy.tun.ply.gg
Port: 19132

04 **Join**
Geyser and Floodgate support Bedrock connections to the Java server.

Console players

Xbox, PlayStation and Switch may not provide the direct Add Server control. Custom server access can require platform-specific workarounds.

Differences from Java

Java-only models and optional client packs may display differently. Voice integration depends on the platform and supported voice setup.

06 / OPTIONAL VISUALS

Resource packs & shaders

Extra animation, textures and shaders for players who want them.

DOWNLOAD	CONTENTS	WORKS WITH
Full Resource Packs	Faithful 32x, Fresh Animations, FA+ Player, Fusion Connected Glass	Full Fabric
Lite Resource Pack	Faithful 32x	Any Java client
Optional BSL Shaders	BSL shader ZIP	Full with Iris

Download Full Resource Packs

Download Lite Resource Pack

Download Optional Shaders

Install resource packs

01 **Extract the bundle**
Extract the outer download ZIP. Keep the individual resource-pack ZIPs compressed.

02 **Copy resource packs**
Open %AppData%\.minecraft\resourcepacks and copy in the individual resource-pack ZIPs.

03 **Enable them**
Minecraft → Options → Resource Packs. Turn on the packs you want.

04 **Install BSL separately**
Extract the shader bundle. Put the inner BSL ZIP into .minecraft\shaderpacks, then enable it in Iris.

Matching visual support

Fresh Animations requires EMF + ETF from Full. FA+ Player uses Fresh Animations and those support mods. Fusion Connected Glass uses Fusion; the available glass pack may not render fully on 26.3. Shaders are optional and can reduce FPS.

07 / PLAYING TOGETHER

Life in the Hollow

A protected mountain community for cozy, on-theme builds.

AREA	BUILDING	EXPECTATION
Hollow Commons (pink)	Trusted Hollowfolk	On-theme builds in the protected mountain settlement.
Hollow Extension	Trusted Hollowfolk	Same intended access and style.
Spawn Core (blue)	No building	Public chests, doors and amenities may be used.
Beyond the hub	Survival rules	Protect your own builds with claims.

Hub safety

The protected hub is configured to prevent new mob spawning, common explosion damage and fire spread. Existing mobs are not automatically removed, and these rules are not world-wide.

Helpful commands

COMMAND	PURPOSE
/spawn	Return to spawn.
/sethome	Save your home location.
/home	Return to a saved home.
/tpa [player]	Request a player teleport.
/map	Open the live map link, if this command is enabled.

Open the live BlueMap

08 / COMMUNITY

Ranks & roles

The names on our rank badges describe roles, not XP levels.

RANK	ROLE	WHAT IT MEANS
Hollowkeeper	Founder / owner	Oversees Toki's Hollow, its direction and community.
Moonwarden	Co-owner	Helps lead and look after the Hollow alongside the founder.
Steward	Administrator	Keeps the server running and handles higher-level staff needs.
Nightwatch	Moderator	Helps players, responds to reports and enforces the rules.
Artisan	Trusted builder	Part of the designated build team; helps create approved community builds.
Hollowfolk	Trusted resident	Community member who may make on-theme builds in the Commons / Extension.
Traveler	New arrival	Starting role; explore, settle outside the hub and earn community trust.

Trusted residents and builders

Hollowfolk are trusted residents who can build on-theme in the Commons and Extension; they are not the appointed build team. Artisans help with approved community projects. Spawn Core remains no-build for regular players.

09 / COMMUNITY

Server rules

A welcoming mountain sanctuary starts with respecting each other.

01. Be kind to people

No harassment, hate speech, threats, bullying or targeted hostility. Keep text and voice chat welcoming.

02. Respect builds and belongings

No griefing, stealing or altering someone else's home, items, animals or projects without permission.

03. Keep the Commons on-theme

The Hollow Commons and Extension are a shared woodland / mountain settlement. Keep builds cozy and theme-appropriate; ask staff before major public changes.

04. Leave Spawn Core intact

The blue Spawn Core is a shared no-build hub. Use public chests, doors and amenities as intended; do not place or break blocks.

05. Claim and respect land

Outside the protected hub, use GriefPrevention to protect your own builds. Respect other claims, paths and neighbors.

06. No unfair advantages

Do not use x-ray, cheats, duplication exploits or ways to bypass protection and anti-cheat systems.

07. Be considerate with PvP and pranks

Fight or prank only with the other player's agreement. Do not repeatedly target, trap or harass people.

08. Keep the server playable

Avoid deliberate lag machines, destructive exploits and spam. Report problems to staff instead of abusing them.

Need help?

Contact Nightwatch or a Steward about problems. Ask before changing communal builds.

10 / NEED HELP?

Troubleshooting

Try these fixes before contacting staff.

Minecraft will not launch

Use 26.3 and ensure installed mods match your Full or Lite download.

Mods are not loading

Extract the outer ZIP, then place individual .jar files in the correct mods folder.

Java cannot connect

Use tokishollow.fun in Minecraft Java 26.3.

Bedrock cannot connect

Use impairment-puppy.tun.ply.gg with port 19132.

Ping Wheel is only visible to me

Shared pings are still being tested; your keybind and personal ping may still work.

Voice chat is silent

Check the client mod, microphone permissions and supported voice connection.

Visual effects are missing

Enable matching resource packs; connected glass support may vary.

I cannot build at spawn

The blue Spawn Core intentionally blocks building.

The game crashes

Try a clean profile and send the crash report to staff.

11 / REFERENCE

Client mod reference

Full = 18 mods; Lite = seven. These are optional client-side Fabric mods.

MOD	INCLUDED	PURPOSE
AppleSkin	Full + Lite	Food, hunger and saturation information.
Entity Model Features (EMF)	Full	Supports enhanced entity models.
Entity Texture Features (ETF)	Full	Supports enhanced entity textures.
Fabric API	Full + Lite	Shared library required by Fabric mods.
Female Gender Mod	Full	Player-model visual customization.
Freecam	Full	Move the camera for screenshots and builds; follow server rules.
Fusion	Full	Resource-pack rendering and connected textures.
Iris Shaders	Full	Optional shader loader.
Mod Menu	Full + Lite	View and configure installed mods.
Ping Wheel	Full + Lite	Personal pings; multiplayer sharing is being tested.
Placeholder API (client)	Full + Lite	Support library for client mods.
ReplayMod	Full	Record cinematic gameplay replays.
3D Skin Layers	Full	Gives player-skin outer layers depth.
Sodium	Full + Lite	Rendering performance improvements.
Simple Voice Chat	Full + Lite	Java proximity voice with compatible clients.
Xaero's Minimap	Full	Minimap and waypoints.
Xaero's World Map	Full	Client-side explored-world map.
WorldEdit CUI	Full	Selection outlines for permitted builders.

12 / REFERENCE

Server features

Already installed by Toki’s Hollow staff - players download nothing.

TYPE	PLUGIN / SYSTEM	WHAT IT DOES
Worlds & protection	WorldGuard / WorldEdit	Protected regions and staff build tools.
Worlds & protection	GriefPrevention	Player-controlled build claims.
Worlds & protection	FragGuard	Block-change history and rollback tools.
Worlds & protection	Chunky	Pre-generates terrain to reduce exploration lag.
Community & roles	LuckPerms	Ranks and permission groups.
Community & roles	LPCF	Rank, chat and player-list formatting.
Community & roles	EssentialsX / EssentialsSpawn	Homes, requests, spawn and helpful commands.
Community & roles	GSit	Sitting and supported poses.
Community & roles	AxGraves	Graves after player deaths.
Community & roles	Timber	Whole-tree chopping convenience.
Safety	GrimAC / TokiGuard	Server-side anti-cheat checks.
Safety	Paper anti-xray	Server-side protection against x-ray mining.
Cross-play	Geyser-Spigot / Floodgate	Bedrock and Java cross-play connection.
Cross-play	BedrockSimpleVoice	Voice bridge for supported Bedrock setups.
Cross-play	Simple Voice Chat	Voice service for compatible Java clients.
Other	Ping Wheel Plugin	Server relay; multiplayer ping support is under testing.
Other	BlueMap	Browser-based interactive world map.
Other	PlaceholderAPI	Supplies information placeholders to server plugins.

13 / REFERENCE

Datapacks & extras

Server-side features that do not require Fabric.

DATAPACK	WHAT IT ADDS
Armor Statues	Pose and customize armor stands for detailed decoration.
Armored Elytra	Combine chestplate protection with an elytra.
Ender Chest Always Drops	Retrieve an Ender Chest without Silk Touch.
Fast Leaf Decay	Leaves disappear more quickly after felling a tree.
Mini Blocks	Collect miniature decorative block heads.
More Mob Heads	Some mobs drop collectible decorative heads.
Player Head Drops	Players may drop collectible heads when killed.
Silence Mobs	Mute certain mobs using the datapack naming mechanic.
Coal to Black Dye	Craft black dye from coal.

Make yourself at home

No matter how you join—Full, Lite, no mods, or Bedrock—please respect other people’s builds, the protected spawn and the woodland theme. Welcome to the Hollow.
